From: Commander, Naval Sea Systems Command
To: Distribution

Subj: CG 47 CLASS FLEXIBLE RUBBER HOSE LIST MODIFICATIONS

Ref: (a) NAVSEA S6430-AE-TED-10,Technical Directive for Piping Devices and Flexible Hose Assemblies dtd 15 July 1996 including: ACN's 1/A, 2/A, & 3/A

Encl: (1) Naval Surface Warfare Center Carderock Division ltr ser 9234/067 dtd 14 Oct 2003

1. Reference (a) provides the criteria for determining hose criticality, inspection requirements, and hose replacement frequency. Reference (a) specifies that hoses classified as "Critical" shall be replaced every 12 years and "Non-critical" hose as having no periodic replacement limit and are allowed to remain in service until they fail the annual visual inspection or fail in service.

2. SEA 05Z9 concurs with the recommended designation changes to critical hose assemblies for the CG 47 class as provided by enclosure (1).

3. It is requested that Naval Surface Warfare Center, Ship Service Engineering Station (NSWCCD-SSES), Philadelphia updates the hose list programs and distributes to all the individual ships.

4. The NAVSEA point of contact is M. S. Felde, SEA 05Z9, phone 202-781-3624, DSN 326-3624 and NSWCCD-SSES Philadelphia point of contact is Al Pappalardo, code 9234, phone 215-897-7242, DSN 443-7242.
